Photograph 5x5 cm

*Name : Nico Di Goro*

Short biography :

I'm 13 years old. I live in Lucignano. I attend the third year of the middle school at the “Rita Levi-Montalcini “comprehensive School in Lucignano (AR).

My favourite school subjects are English and Maths. At the weekend I like going to the cinema with friends. In my free time I play football for Arezzo youth football team. I started playing football when I was six years old.

The story :

- Why this subject ?

I chose just this topic because it is related to a reality typical of the environment I live in Tuscany. One of the most relevant agricultural production in this land is just olive oil, which is produced in November. The idea for this subject arose when my grandmother looked for the oil bottle on the shelf and in the meantime she told of when she was little and went to buy oil at the mill. This reflection helped me to choose the topic and to invent the story.

- The writing : difficulties, process
- During the drafting of the text I didn't find major difficulties . The appearance that made me reflect more deeply was the structure of the text.

## **“Authors and Directors with a Cause: Inspiring Young Europeans Today?” (“ADC”)**
